

Researches have also shown that SARS-CoV-2 Spike protein optimized for binding to hACE2 is the result of natural selection⁴⁴². So the SARS-CoV-2 virus being a laboratory created virus is not plausible.

In conclusion, researches have found that the SARS-CoV-2 virus is a naturally occurring virus and no proof have been found that the SARS-CoV-2 virus has been created in a laboratory. So, the theory of SARS-CoV-2 virus being a biological weapon can be considered a conspiracy theory that mostly has been proved wrong.
